

Prahlad Chaudhary

Full-Stack Web Developer (Backend-Focused)

PHP · Laravel · React.js · Node.js · AI Agent Development

PROFILE

- I am Prahlad, a dedicated developer with strong experience in Laravel and full-stack web development. I build secure, responsive, and user-friendly web applications using PHP, Laravel, JavaScript, React.js, Node.js, and MySQL. I have worked on RESTful APIs with secure authentication and integrated payment gateways such as Razorpay, PayPal, Stripe, Cardcom, Braintree, and Elavon to meet different client requirements. I have also built an AI agent using Pabbly and webhooks to automate workflows and streamline data processing tasks. I focus on writing clean, maintainable code and delivering reliable backend solutions. I am a quick learner with strong problem-solving and debugging skills, and I work well in team environments.

EDUCATION

- Ampics College – Ganpat University**
Bachelor of Computer Applications (BCA) | 2022 – 2025
 - Successfully completed degree in 2025
 - CGPA: 8.21 | Highest SGPA: 9.00

SKILLS

- HTML5 & CSS3
- PHP
- Laravel (PHP Framework)
- AI Agent Development
- JavaScript (including AJAX)
- React.js
- Node.js
- Express.js
- MySQL / Database Management
- RESTful API Development
- API Authentication (JWT/Sanctum)
- Payment Gateway Integration (Razorpay / PayPal / Stripe / Braintree / Cardcom / Elavon)
- Bootstrap / Tailwind CSS
- Git & GitHub
- JSON & Third-Party API Integration
- Responsive Web Design
- MVC Architecture
- CRUD Application Development

EXPERIENCE

NCode Technologies, Inc.

Feb 2025 – Aug 2025 (6 Months)

- Completed 6-month internship, gaining hands-on experience in live projects.
- Worked on bug fixes, feature implementation, and task execution under senior guidance.
- Enhanced practical knowledge of web development and real-world project workflows.

KAD Infotech

Sep 2025 – March 2026 (7 Months)

- Mastered advanced Laravel framework updates and modern development practices in a professional production environment.
- Developed expertise in international payment gateway integrations, including Braintree, Cardcom, Elavon, and Converge for cross-border transactions.
- Refined workflow processes and coding standards, ensuring zero-error deliverables and maintaining professional-grade code quality.
- Actively expanding skill set through continuous learning and hands-on implementation of emerging web technologies.

Rudram solutions

March 2026 – Present

- Joined the team as a Full-Stack Developer and contributed to real production work from day one
- Built clean, responsive user interfaces with React.js and developed reliable, maintainable backend APIs using Node.js
- Improved website performance by applying lazy loading, code splitting, and smart caching to reduce load times
- Built an AI agent within the company using Pabbly and webhooks, including an AI call system and AI communication system to automate workflows and improve efficiency
- Worked in a quality-focused team where every feature was reviewed before deployment

PROJECTS

V-Work – Project Management System

Built a Laravel-based web app with role-based access for admins and users.

- Secure authentication system with separate dashboards for Admin and User roles
- Project and task assignment by Admins to specific users
- Time tracking and logging for each task
- Live project/task status updates with real-time synchronization
- Real-time discussion/chat system with date-wise message grouping (e.g., "Today", "Yesterday")
- Seamless user collaboration through instant updates and notifications

MISCELLANEOUS

○ Languages Known

- English, Hindi, Gujarati
- Full Professional Proficiency

○ VibeCart – E-commerce Website

- Built a Flipkart-style e-commerce website with full user and admin functionality
- Implemented product filtering based on main category, category, and subcategory
- Added cart and wishlist features with guest user support
- Integrated coupon-based checkout system
- Developed order tracking functionality for users
- Built admin panel for order management and control
- Made the website fully responsive for all devices
- Deployed and made live at: vibecart.free.nf
- Excluded payment gateway integration as the project is focused on learning purposes

○ FlashMarket

- Worked on resolving frontend and backend bugs to improve platform stability.
- Implemented feature updates and enhancements based on manager-assigned tasks.
- Contributed to overall performance and user experience improvements of the live application.

○ Laravel Product Enrichment System using ChatGPT API

- Integrated OpenAI's ChatGPT API into a Laravel-based product management system to automate product data enrichment
- Enabled AI-driven generation of product titles, descriptions, bullet points, and SEO metadata from minimal inputs like product name or key features
- Implemented queue-based processing to handle bulk product enrichment efficiently
- Added token usage tracking to monitor and optimize API consumption
- Integrated DeepL API along with ChatGPT to support multilingual product content generation for global catalog publishing
- Enhanced system scalability and automation for managing large product datasets effectively

○ Charity Exchange

- Successfully migrated legacy codebase from PHP 7.2 to PHP 8.2, ensuring compatibility and improved performance.
- Upgraded Laravel framework to the latest version, implementing modern best practices and security enhancements.
- Optimized website performance, significantly reducing load times and improving overall user experience.
- Developed and integrated RESTful APIs for seamless third-party service communication and data exchange.
- Maintained backward compatibility while modernizing the entire application architecture.
